## ENVIRONMENTAL POLICY

***Green Valley Industrial Park as an organization that develops infrastructure and services, promotes a friendly Environmental Culture together with its collaborators and stakeholders.***

As one of its fundamental purposes Green Valley Industrial Park, being its corporate philosophy the sustainability, assumes from its highest levels of Corporate Governance the responsibility to respect, protect, conserve, the environment, its biodiversity and ecosystems and in a structured and coherent way mitigate climate change.

Preserve the environment and reduce environmental impacts as part of our daily work promoting professionally and / or scientifically friendly practices with the environment.

Comply with environmental legislation and other environmental legal requirements that our organization subscribes or is legally responsible to comply with, continuously and systematically encouraging this compliance on the part of our interested parties.

Strive for the continuous improvement of our processes, services and activities in order to move forward with the established purpose of promoting an enabling environment so that the production activities of our clients and that they are done in a balanced development environment.

Establish objectives and goals of environmental protection, making periodic reviews to evaluate our performance and improve the environmental management system by controlling the environmental risks that may arise from the different activities that are carried out, always seeking the reduction or minimization of negative environmental impacts. in water, air, soil and environment in general.

Promote the awareness, training and information of our staff, customers, suppliers and other collaborators in the observance of the principles included in this Environmental Policy.

Present and develop strategies to reduce atmospheric emissions and establish measurement parameters and indicators that allow compliance with the objectives set in this direction, promoting efficient solutions and using the most respectful technologies with the environment.

***The management is committed so that this Environmental Policy is understood and assumed by collaborators making it available to the public. It also undertakes to ensure its application and to periodically review its content, adapting it to the nature of its activities and the environmental impacts that may be generated, as well as the general strategy of the company.***
